

PVC Hygienic Wall Cladding

Our PVC Hygienic Wall Cladding range offers a cost effective solution and conforms to current hygiene and fire regulations class 1 fire rated.

The sheets are commonly used to clad areas that require high standards of hygiene, namely kitchens, clinical environments and wet rooms and existing areas where old plaster and ceramic tiles have previously been installed.

Our Hygienic Wall Cladding is 2.5mm thick with sheet sizes:

3050mm x 1220mm x 2.5mm

2500mm x 1220mm x 2.5mm

Standard white and pastel range all in stock.

All our Hygienic Wall Cladding can be thermoformed to reduce need for trims and keep out germs.

If you require any assistance or advice please contact one of our friendly staff who will endeavour to help you choose the right product at the right price. Please call us on 08454 341000 / 08454 342000 or send us a message via our contact form.

Hygienic Wall Cladding Profiles

We offer a range of wall cladding trims and profiles from:

Two Part Joint Trims

Start and Finish Trims

All above have gasket seal which effectively eliminates 99.9% of germs.

Also Internal and External Corners and Angle Profiles to suit all in standard white.

Pastels range of Two Part Trims is also available to suit our range.
